

FACTSHEET

LOGIN: Making Logistics Work For You

LOGIN. Making Logistics Work For You.

A company driven by innovation that will make an impact in the global freight forwarding landscape. A force to be reckoned and A phenomenal success that is destined to rise above its competitors.

Introduction

LOGIN is a growing freight forwarding and logistics company focusing its sales and marketing efforts in North America. In addition to freight services, LOGIN will bundle additional services that entail extended capabilities and integrated technology to provide value-add to its customers.

LOGIN is focusing on Import to USA from Asia, Turkey and Italy, concentrating on its seafreight and airfreight forwarding business and is collaborating with strong regional partners, offering strong operational footprint, where the main production centers are located.

The FCL sector is the day-to-day business for LOGIN; with LCL consolidation and deconsolidation constituting another core service.

LOGIN is placing great emphasis on Buyer's Consolidation, which is a more complex service and will help LOGIN to build a long-term business relationship with its clients.

LOGIN has set up a centralized customer service center in Charlotte, NC and a streamlined management office in Los Angeles, CA – supported by local account and sales managers strategically located throughout USA.

Considerations

- **Strong Management Team**
The combination of specialized experience and entrepreneurial spirit of the management team, coupled with in-depth industry expertise and corporate discipline, provides LOGIN with a unique mix of talent to achieve its corporate goals.
- **Specific Focus**
Not just another freight forwarding and logistics company, LOGIN is about making a difference. The company is focusing predominantly on Import to USA, from Asia and Turkey.
- **Competent Sales Force and Superior Customer Service**
LOGIN has employed a competent sales force supported with superior customer service. The company has adopted a positive service strategy that entails responding to requests from customers, partners and vendors in the fastest time possible. This upbeat service philosophy will project the image of LOGIN to clients as being always "on top of things".
- **Cutting-Edge IT Capabilities**
LOGIN has acquired a best-in-class IT system to support its sea and air-freight operations, both on the Asia-origin end and the US-destination end. This IT system will have comprehensive track-and-trace capabilities that will allow clients to view shipments by various fields as well as to generate online reports.
